14 Days on A.G.E.Pill

Hi, I'm 51 years old single father of two young children.

I started taking the A.G.E. Pill soon after its delivery, August 16th evening, normal dose. I was on holiday with my children.

The 18th morning I was caught by a horrible back strain: I could barely walk and had to sit down to control pain. Luckily I had my Thermanol and used it many times in the day with some relief.

In the afternoon I doubled up the A.G.E.Pill and in the evening I started to feel better. The night was unpleasant but I could stand the pain and on the morning I already felt a lot better. I helped (lightly) moving to another house, drove to a ATM, walked and managed to end the day successfully. The following morning almost all pain was gone and could literally feel my body rebuilding itself.

In 3 days from the episode I was a 70% without any drugs.

Astonishing!

Besides I felt energized, my nails started to grow a lot faster, my skin became wrinkleless despite the raging sun in the south of Italy.

10 days from the start my intestine literally reset itself to a new working mode so efficient that I don't remember it going so well in years.

Fast results delivered and it's just the first 14 days.

thanks Sisel and thanks Tom Mower for this giant opportunity

At the risk of repeating myself I have an additional thing to mention with the AGE Pill. My finger nails are looking better! They are growing in a nice shape, naturally white tips, not chipping or breaking! Other things I've already mentioned are: decreased appetite, and tons of energy, like I can go ALL day into the evening with full-on energy and clarity, that's UNHEARD OF for me in the last 20 years!

Day 28: My brain is on fire with clarity, focus & energy level is more than phenomenal. I see changes on the outside that to me, are astonishing. Crepe on arms virtually gone, legs? Well, not mini-skirt ready, but vastly improved. I thought I'd need men's sock garters to hold up my sagging calves I was so proud of. Respiratory congestion so much better. Lower BP & dosage cut in half (the only pharma I take) I can't see on the inside but if it's anything like the outside, I'm in. The cool part is I'm getting ME back. Personality (Oh no, she's baaack) confidence & I want to get out & DO SOMETHING after being a hermit. Unless someone commented I'd never know I have a glow about me. One commented my Rosecea was gone. I say faded. Overall appearance: Healthy! Thumbs up! Let's rock this! I am! Thank you Tom Mower. Dude! You Rock!

I picked up this nasty flu. I doubled my age pills to 12 a day and it stopped it overnight. No more coughing or sneezing. An amazing turn around. These products are truly amazing.

Great results so far. Day 3 on the AGE pill and last night had a fantastic deep sleep. For a person who is not a great sleeper and usually has to get up and go to the bathroom during the night, I slept right through. How I can describe the sleep is comparing it to the amazing sensation when I was coming out an anaesthetic for shoulder surgery a few years ago. That feeling when the nurse is waking you up but you DO NOT want to waken from such a blissful sleep!!!

Tom mentioned in Tuesdays call the A.G.E. pill is suitable for teenagers? How old can one start on it and at what dosage? What benefits would they hope to see and feel?

Jodie Davies: I have my 18yr old daughter taking it. Looking to support her health and the damage from multiple AB's over the past year, recurring tonsillitis that has seen her hospitalised. It is so far supporting her with less fatigue, early days yet but very hopeful as a concerned mum.

Should people experience Niacin Flush every time they take the A.G.E. pill?

Mike Onions: On the AGE PILL for 3 weeks - zero niacin flush - so energized -,no brain fog - much more mental alertness. You know when you're tired and you splash cold water in your face - that's what's it's like ALL THE TIME, now!!!!

Does anyone have anaemia problems that they solved?

Jill Rose: I have had trouble with anaemia for quite some time now and heard my heart beating in the left side of my head and sometimes all over the body. Had a series of iron injections (13) was always tired and had to go to bed a lot. Since starting the age pill 10 days ago I am hardly tired at all, energy has increased I am not dizzy and its not an effort to do things anymore. Am going back to have another blood test to see if they notice any results since taking the pill.

My Mom 11 days on the A.G.E pill- slight increased energy, hair softer, but most of all she says the fine lines are diminishing and her clothes are feeling looser!! Her motivation to do things has really improved!!

Day 23 on the A.G.E. Pill, woke up with so much energy, I am not sure it is happening, but I noticed that I did not notice my goitre. It has been shrinking with my Triangle of Life over the years. I never killed off my thyroid just was put on a pill to slow it down so it would slow down the growth of the goitre. So who knows, maybe my endocrinologist will take me off the pill on my next visit! I cannot confirm this without my doctor checking it out, but as soon as I have something concrete I will let you know. I get my thyroid blood work done this fall. I don't see my endocrinologist for a year and a half unless there is a change. So possibly in February. Very exciting for me as this is the only prescription drug I take and feel very fortunate, as most people my age are on many drugs!

Day 18 on the AGE pill with double doses for this first month. Continued improved mental clarity and focus. Also noticed a vast improvement in symptoms from my anxiety with a noticeable calming influence. BIG bonus.

Still sleeping very soundly and its unknown what positive residual health effects come from that. But when I am up I am very energetic, not a hyperactive caffeine type of energy. Just a consistent level of high energy throughout the day, but when it's time to go to bed,I SLEEP without waking until morning.

All of those lovely little aches and pains that come from aging have been eliminated. Nice!!

I plan on ratcheting back to normal doses after the first month is up. I see no reason to continue doubling up after then.

While my results are far less dramatic than some folks with far more serious health issues have reported, my positives are substantial enough to warrant continue usage. All in all. a big thumbs up!!

Day 19 on the A.G.E- my hair is no longer falling out when I wash it!!!!!! This has been something I have dealt with for years due to my thyroid. Also the severe dry skin on my legs and arms is no longer a issue!! This is incredible !!!

17 August 2017

Another A.G.E. Pill testimony, today is my 18th day on this amazing product! I was walking the dog this evening and reached down to tie my tennis shoe, and I noticed my varicose veins on my ankles looked different, they are lighter and some not showing at all! The one spot where they were bulging on the inside of my right ankle is fairly smooth. I was getting ready to make an appointment to have my veins looked at, now I am thinking I may not need to. This product is very exciting, I love the surprises each day of feeling better and noticing subtle changes each and every day. All I can say is WOW! Thank you Tom Mower and Sisel International.

FaceBook August 2017

I have been on this new amazing product, The A.G.E. Pill, it is 2 weeks today. And all I can say is WOW! I am seeing so many improvements and feeling wonderful with a lot of energy, sleeping much better, and wake up with a so much get up and go each day. When I wash my hair I usually lose quite a bit of hair in the shower and from brushing. This morning I realized I am not losing hardly any hair. My skin is not requiring as much lotion throughout the day. My eyebrows are getting thicker, which is good. I have added this product to my daily regimen along with what we call the Triangle of Life, FuCoyDon, Eternity and SpectraMaxx and I also am taking our TS-X. I will keep you posted on my journey on these products, everyone should be taking them!!!

My Husband said to, SHOUT IT OUT!

That A.G.E PILL really works!

He's a CEO, finished a Board meeting at 1am, came home, swallowed 6 tablets before bed and up 2 hours later for work. Normally a bit jaded, but this morning he wasn't. He rang to say, I have ENERGY, I'm ALERT and has had frequent and good bowel movements..

"I FEEL BLOODY GOOD!"

This is for anyone who's a sceptic, like my husband AND IT'S NOT EVEN 24 HOURS!!

Ivan King

FaceBook 20 August 2017

Let's keep the A.G.E. pill testimonies coming.

For myself, I have seen better bowel movements, my urine is more of a light colour instead of bright yellow and better sleep.

Does the AGE pill help with genetic conditions, which are not related to aging in any way? It's simply due to hereditary genes?

Comments:

Vickie Spicer That's exactly why I'm taking it. Our family genetic tree is not good & I'm no quitter. I've been researching since 1981 when I lost my mom to cancer; she was 46.

Tom Mower Even if it could or could not it would be criminally illegal for us to say it did. However aging is not a disease and therefore we can improve regeneration eliminate most decay and clean up the Stem Cells and then provide the super complementary medicine to greatly enrich Stem Cells it acting youth fully I would think that would help anyone's help in most any healthy shoes including some of those that a genetic condition might have made worse but through super nutrients can provide support to mitigate some of the effects
