From my friend Cindy Parrish!!

Today I went to the Dr. I have had high blood pressure for the past year. Today it was 110 over 80. He asked me what I was doing. THE AGE PILL doing wonders for me.

I've been reluctant to share this because I didn't actually know where it was going but I have a pretty profound testimony to share. 15 years ago with my total Hysterectomy I also had a bladder repair surgery at the same time due to a pro-lapse they told me the mesh they used would only last about ten years. Well it lasted fifteen and I've been having bladder leakage and frequency for about eight months when I decided to go to a urologist. Had a test done then they wanted me to follow up for more testing but I cancelled the appointment and decided to wait a while longer. This is embarrassing and shouldn't be happening at my age.

Just out of the blue it dawned on me that I'm not having the issue of bladder leakage like before. Wow. It's just gone. The frequency has gone as well.

Do I think it's the A.G.E. that's the only thing I have done different and sure didn't have a surgery!!!!!!
38 days on the AGE.

Day 4 A.G.E pill. I leapt out of bed this morning. I had the best nites sleep I've had in months. It's the first time I slept through the nite. First few days coughed up phlegm and again today(not a smoker). Husband just began today coughing up phlegm as well(not a smoker) we both started at same time. shoulder nearly right knee improving. I drank 2litres water yesterday as well. Only part of this due to pills as over 2 weeks I have lost 18 pounds. will monitor closer in coming weeks. I am happily surprised

Edith Smoothy I found that interesting as I've had a head cold & also coughing up phlegm . Never been a smoker but been involved with family who are. I've also had headache & sore throat so put all down to a head cold. So where to from here.

Well I'm back on board it's been a hard road getting well again, I have been seriously ill but on the way up as finally my health issue was being solved, however the fatigue and brain dead issues were horrible.

I have been on the age pill high doses and my energy is up and my brain is functioning again its quite unbelievable, I'm shocked to have kicked back so fast Tom said I would and told me to make sure I took the trio Fucoidan Spectra Max and Eternity with omega plus as well.

Baring in mind I have been ill but the results are amazing also my skin has improved no end Tom has always produced top products that's why I'm with him today.

As you know Tom Jnr is coming over please book in to see him the news you are going to hear is exciting such changes for the best I'm excited about the business product availability and more exciting things to come please don't miss it REGISTER DONT MISS OUT ,go into the link you have been sent the cost is nothing.

More news will be available next week keep that in mind we may have had a tough time in the past but the future is going to be so good enter guests as well and if you want to build a great business the rewards will be there the AGE PILL WILL TURN US AROUND and there are more breakthroughs coming please read the attachments all good if you have not seen them yet.

Day 21 on the A.G.E. and I can report that my skin is still improving! Becoming softer and smoother as days go by. Bloody impressed considering I turned 50 in July!

But this is new hair growth on either side of my forehead - new little soft tufts of hair. One of my work colleagues noticed at work on Thursday, so I took the photo that night. Amazing progress!

After talking with quite a number of A.G.E. pill customers the following observations have been made. Drinking inadequate amount of water slows the effectiveness of the age pill. Big coffee or tea drinkers generally don't drink enough water they seem to be getting slower results

I am excited finally be able to share my own success story about the AGE pill. I took my first evening dose of the AGE pill on Wednesday evening 30th August.

3 capsules. I started double dosing as Tom recommended on Tuesday of this week and up until this day, (Thursday 7th Sep) 8 days after starting, apart from noticing a little more energy and a feeling of being "high" I had no great story to share.

Thurs afternoon I was asked to help unpack boxes and boxes of personnel files and not only did I have the energy to keep going and unpack the files very efficiently but also I noticed I had no trouble with picking up large amounts of files and no pain or stress on my hands. Not only that but I was able to get up and down with so much ease - usually I would have been tired - but instead I was extremely energised. Katie Larking has since pointed out to us that large amounts of water help the process and I drank a litre of water in short time.

Yesterday I went along to a Meet-up and found that my memory recall was incredible and my thought processes were unbelievably quick and I ended up almost hijacking the meeting with my excitement about the Age pill research. So, to anyone not experiencing results - if you can try to drink a litre of water - this really helps the whole getting rid of wastes process. Thank you Tom for an amazing product!!

A.G.E. PILL TESTIMONIAL - from Lynne Ferguson
I have been on the A.G.E. Pill for 5 days. Wow!

During the first couple of days, I noticed that my mood was "happy"...that is the only way I can describe it. I am very alert and usually stay awake until 11-12pm and get up between 7-8am. When I go to sleep, I sleep soundly.

This feeling of contentment and happiness has remained the entire 5 days. I hope it continues. I have always been an optimistic person, but the optimism has increased a lot. It is like being on a smooth, sustainable "emotional high". It is a good thing.

Sisel A.G.E. Pill is the Greatest product to EVER Hit the Market. Sisel - A Life Worth Living!!!

Thanks for adding me to this awesome group. My husband and I started the A.G.E. pill on Wednesday night (the day our order arrived) and, I know this is not supposed to be part of the A.G.E.pill experience, but I have started losing weight. My jeans are a little more comfortable to wear today... It has only been 72 hours... Wow! I will definitely be documenting my A.G.E. pill experience

A.G.E. PILL TESTIMONIAL - from Kate Brighton
Fibromyalgia

I have fibromyalgia and have really struggled for many years. I always said the hardest thing was living without sleep. I now sleep 10 hours a night and just love the way I feel. The AGE clears your head and life is just wonderful. How very lucky are we?

Day 16 AGE pill update. For the past 40+ years I have never slept for longer than 2 hours at any one time. One of the unexpected side-benefits of the A.G.E pill is that this past week I am now more often sleeping deeply for 4-6 hours at a time.

A friend's wife, Kaye, has had the same problem; so began taking the AGE pill a week ago. So far there has been no apparent change in her sleeping patterns - but, what she has noticed is that the black circles that she has had under her eyes for ages have gone, and the skin bumps she has had in her hair-line for years are significantly reduced.

My testimony for the A.G.E. Pill: My home was spared from the flood waters, but any direction you look you see nothing but water. Very little sleep was possible with Harvey's arrival Fri. & the pounding rain through Tue. I was able to make it to the hospital where I work Wed. evening to relieve my boss who had been here since Fri. I have done 2 x 11 hour shifts, & this evening I went for a walk around the perimeter of the building. Tonight will be my 3rd night to sleep on an air mattress here in the pharmacy. I have energy to spare, I am mentally alert, & I will be ready to pull another shift tomorrow.

2 September 2017

I'm really focused on before and after photos as I've had my own personal 'transformations' over the years and indeed with our Sisel skincare range.

Often, some improvements can go somewhat unnoticed, until photos are placed side by side. I thought my hands looked better since starting the AGE and I hadn't thought to take a photo at the beginning, so 8 days in was my first photo. Another 8 days, on Day 16 and the improvement is more than evident.

I focus on same lighting, same time of day (morning after I wake up) and in the same position/angle and same background for consistency and true representation of the real results. Clear, un-blurred images will tell the true, impactful story of this amazing product!

Additionally, nothing applied to my hands in the mornings before the photo is taken. Photos taken literally within an hour of me getting out of bed.

I look forward to next week's photo which I will take in another 8 days for consistency

Day #6 on the A.G.E. pill---I have been taking double doses also. I have spent all summer being absolutely in misery and tears because of my asthma. The air quality in Texas is absolutely horrible especially in August. I was at the point where I was afraid I was going to lose my job. Just when I thought the bad air quality went away it came back yesterday. I could really just cry. The level went to orange again and about to hit red and I only noticed it MILDLY and it went to red and OMG I could still breathe. I am absolutely flabbergasted. I can still notice it but three weeks ago. I was sitting at work and sucking on my breathing machine and I couldn't MOVE AT ALL because the least bit of motion would have started an asthma attack. I survived it going up to 172 last night and I am only on day 6. I have finally found something to fight. If you don't know the levels of air quality 172 is unhealthy for anyone to encounter, let alone someone with Lupus. I COULDN'T BELIEVE IT!! Have a GREAT DAY!!

FaceBook 2 September 2017

WOW!!! Check out more changes with Gingers hair. The first photo is August 15th where you can clearly see the darkening underneath at the roots but also note how white it is at the front. Her hair was totally white at the roots before starting the AGE on 7/29/17. The other two are today Sept 2nd just look at all the white at the roots is gone!!! Colour coming back like crazy !!!

THE A.G.E pill is just awesome on so many levels.

WOW OH WOW! Look at these fantastic results that Julia Hill-Silva says and posts a photo of what & how THE AGE PILL powerful support formula has done for her husband Daniel in just over a month!!!!

Julia exclaims:

Wow!!! That is totally amazing that taking the age pill for 5 weeks that nutritionally supports the natural system in your Stem Cells and restores vital high performance natural ingredients allowing your stem cells can make you younger! I used to colour his hair once a month and now he won't let me and I just bought all the new colouring too. I guess I need to return that back to the store that's even better no chemicals!
