After being on the A.G.E. Pill for 8 weeks I find that traveling is not so hard on my neck and back as it has been in the past. Our trip to Utah last week driving to and back in 3 days then a week later hopping on an airplane and flying across the country for a convention and sitting in the convention chair all morning. I got up for lunch and was going to go look for a place to stretch and then I realized I didn't need too. Absolutely no neck or lower back pain. I've dealt with this for off and on for over 2 years. Feeling fantastic.

### **Kate Brighton loves THE AGE PILL**

FaceBook 25 September 2017

I wish to tell everyone if you contract this nasty flu that is raging everywhere, double your AGE pills intake and they will kill it in 24 hours. I did it and so did my sister. My sister is really the healthy one and takes it to stay young. She said her skin on the back of her hands felt much softer. Well she took her AGE pills, twice the dose to stop the nasty bug she picked up yesterday. Today she says "Thats incredible" today the bug has gone. I think she now has more belief in the AGE pills. When your just so well its hard to know. As with Max and I we REALLY know it doing things. Good luck everyone.

This explains some of the ways that The A.G.E. Pill works. Amazing! Boost your energy with the AGE Pill by SISEL

# Mitochondria and ENERGY

- **What is mitochondria?**

Energy comes from our mitochondria - the small energy factories in our cells that produce ATP. Mitochondrial cells are like little batteries that produce adenosine triphosphate (ATP), which is the cellular fuel your body uses for all activities.

- Mitochondria are found throughout the human body, but especially in your muscles, brain, and heart. If you can greatly increase the number of mitochondria you have and the amount of ATP they produce, your brain will be *super-focused*, your athletic performance will *peak*, and your energy will be *boundless*. How can you do it? The answer is... **The A.G.E. Pill** by SISEL

### AGE SPOTS & LIPOFUSCIN

We can see the direct effects of how we age, including age spots on our hands and face. Age spots are a result of Lipofuscin, which is a cellular pigment made up of chunks of molecular waste. Lipofuscin accumulates in the neurons, heart, and skin as people age. These age spots are not a sign of ill-health, they simply indicate that the skin cells are no longer regenerating properly.

A.G.E. Pill TESTIMONY - Bruce in Texas

### Eyes and Vision

I have cataracts and driving at night I have a problem with lights, especially headlights, causing halo/flare effects with my sight, I was driving home Tuesday night and noticed that the halo/flare effect was greatly reduced. The A.G.E. pill is the only thing different. It's great.

FaceBook 26 September 2017

I started the A.G.E. pill 4 days ago. I experienced extreme amounts of phlegm up until the time I got up this morning. Today, I needed to blow my nose one last time, so at church I went into the restroom to blow my nose. When I was washing my hands, I looked into the mirror; and I noticed what I believe is a significant change. Before I started the A.G.E. pill I had terrible looking dark circles around my eyes. When I looked into the mirror all I had were some very dark crescents about 3/4 of an inch under my eyes. The areas around my eyes is starting to look normal. On Tuesday, my wife and I are going to take new Before and After pictures. If I see something significant, as I believe I will, I will post the pictures to show comparison. It also seems that my fingernails are growing faster. My wife's blood sugar are normal where before she started taking the pill, it was always higher after she gets up in the morning than when she goes to bed. She has been having the symptoms of a leaky liver. So, it seems things seem to be going well.

FaceBook 27 September 2017

It's truly astonishing to see the results everyone is experiencing on the A.G.E. Pill. Significantly more energy, improved mental clarity and focus, hair filling in, blood pressure dropping back to safe and healthy normal ranges, the aches and pains of middle and old age disappearing, etc. It's amazing how our bodies can heal themselves if given the proper building blocks for repair - NAD+ in this case

I have lost 11 pounds in 6 weeks - with out changing anything else.
