At the age of 89, **Brain Vitality** has restored my mother-in-law's memory. It truly is reversing her dementia. She knows who her children and grandchildren are again. She also remembers to eat and care for herself. It's great to have her back!

T Sentas, Massachusetts

The **Brain Vitality** has helped our son with his concentration and learning problems and surprisingly has helped stop his bed wetting.

Now he can sit still to read a book and can hold a lengthy conversation. He has also improved his school grades. We are so thankful for the results we've seen.

The Millers, Ohio

We want to share how pleased we are with the **Brain Vitality**. Our 9 year old son has had many school related struggles. He redid 2nd grade, switched schools in November this year in 3rd grade. He was evaluated by the Autism Center in December and they recommended prompt intervention from his school district for possible dyslexia and other issues. At our January conference his teacher definitely agreed with us, showed us some writing samples, etc. Meanwhile, he started taking **Brain Vitality** in January. At the end of March (2014) I met with the school superintendent, principal, teacher, and reading specialist. Long story short, in those 2 months on **Brain Vitality**, he made such progress, they saw no need for intervention anymore!!!! He also quit wetting the bed, which has been another whole issue in itself. We even put him through an \$1800.00 program for bed wetters with no success! So, needless to say we are huge fans of **Brain Vitality**!!!!
