American to repeal the law providing immunity to vaccine manufacturers
https://petitions.moveon.org/sign/repeal-immunity-for-drug?mailing_id=41329&source=s.icn.em.cr&r_by=14854626

Some statistics provided on the MMR and particularly measles. Five searches on the Medalerts website and came up with these results
KM noreply@list.moveon.org – 10 February 2019

1. Did anyone have a life-threatening incident after receiving the MMR vaccine?

1,214 such cases were found.

=====

2. Did anyone have to visit the ER after receiving the MMR vaccine?

29,212 such cases were found.

=====

3. Was anyone hospitalized after receiving the MMR vaccine?

6,321 such cases were found.

=====

4. Was anyone disabled after receiving the MMR vaccine?

1,607 such cases were found.

=====

5. Did anyone die after receiving the MMR vaccine?

392 such cases were found (244 of these were children under 3 years of age).

=====

Has any doctor given you this information?!! You decide if the MMR vaccine is safe.

Marilyn comment

According to Orthomolecular Medicine - **Orthomolecular Medicine News Service, March 26, 2015 - Measles and Cloudy Thinking** - by Ralph Campbell, MD

Quote from the article. "However, in the United States over the past 10 years the CDC reported zero deaths from measles."

Since this report was published the CDC has confirmed that the Disneyland Measles epidemic was **CAUSED BY ONE VACCINATED WOMAN!** I know I have this information on one of the many vaccination/immunization pages just don't know which one!

ARE VACCINES CAUSING MORE DISEASES THAN THEY ARE CURING? Alan Cantwell **MD: retired Physician and Cancer researcher.**

R Therapeutics <9.therapeutics@gmail.com>

9 February 2019 provided these extracts from the full article:

(A few extracts here): In the 1960s it was discovered that Polio vaccines manufactured in monkey kidney tissue between 1955 and 1963 were **contaminated** with a monkey virus (Simian Virus, number 40). Researchers are now connecting SV40-contaminated Polio vaccines to an increasing number of rare cancers of the lung (**Mesothelioma**) and bone marrow (**Multiple Myeloma**). In a 1999 report, SV40 DNA was detected in tissue samples from four children born after 1982. Three were kidney transplant patients, and a fourth had a kidney tumour. Could SV40 be passed on from parents to their children? *No one knows for sure.* During World War II a Yellow Fever vaccine manufactured with human blood serum was **contaminated with Hepatitis virus** and given to the military. As a result, more than 50,000 cases of serum hepatitis broke out among American troops injected with the vaccine.

Covert Vaccine Experiments: Using children as guinea pigs in potentially harmful vaccine experiments is every parents' worst nightmare. This happened in 1989-1991 when *Kaiser Permanente of Southern California and the US Centres for Disease Control (CDC)* **jointly conducted a Measles vaccine experiment.** Without proper parental disclosure, the Yugoslavian-made "high titre"

Edmonston-Zagreb Measles Vaccine was tested on 1,500 poor, primarily black and Latino, inner city children in Los Angeles. Highly recommended by the World Health Organisation (WHO), the vaccine was previously injected into infants in Mexico, Haiti, and Africa. **It was discontinued in these countries when it was discovered that the children were dying in large numbers.**

Unbelievably, the Measles vaccine caused long-term suppression of the children's immune system ~ for six months up to three years. As a result, the immuno-depressed children **died** from other diseases in greater numbers than children who had never received the vaccine. **WHO pulled the vaccine off the market in 1992.** Could the sharp rise in Asthma in poor children be connected with immunosuppression caused by a barrage of vaccines, as well as a lack of quality medical care and insurance, poor diet, and environmental factors?

The possible connection of immunosuppressive vaccines to diseases like Asthma has never been raised by health officials. One out of every four African-Americans believes AIDS was developed as a genocide programme by the US government to exterminate the black population. But vaccine experiments in the 1990s have not been limited to blacks.

Millions of female Mexicans, Nicaraguans and Filipinos have been duped into taking Tetanus vaccines, some of which contained a female hormone that could cause miscarriage and sterilisation. In 1995, a Catholic human rights organisation, **Human Life International**, accused the WHO of promoting a Canadian-made Tetanus vaccine laced with a pregnancy hormone called *Human Chorionic Gonadotropin Hormone* (HCG). Suspicions were aroused when the Tetanus vaccine was prescribed in the unusual dose of five multiple injections over a three month period, **and recommended only to women of reproductive age...** When an unusual number of women experienced vaginal bleeding and miscarriages after the shots, a hormone additive was uncovered as the cause. **Apparently the WHO has been developing and testing anti-fertility vaccines for over two decades.**

Women receiving the laced Tetanus shot not only developed antibodies to Tetanus, **but they also developed dangerous antibodies to the pregnancy hormone as well.** Without this HCG hormone the growth of the foetus is impaired. Consequently, the laced vaccine served as a covert contraceptive device. **Commissioned to analyse the vaccine, the Philippines Medical Association found that 20 percent of the WHO tetanus vaccines were contaminated with the HCG hormone.** Not surprisingly, the WHO has denied all accusations as '*completely false and without basis,*' **and the major media have NEVER reported on the controversy.** For further details on this issue, consult the Human Life International website (www.hli.org).

Newly approved vaccines may also pose serious risks. In October 1999 a vaccine against "*Rotavirus*" infection (*which causes most cases of childhood diarrhoea*) was pulled off the market. One year after the *RotaShield* vaccine was inoculated into over a million infants, **it was found to increase the risk of bowel obstruction.**

In '*AIDS & The Doctors of Death*' I wrote about the development of the first human "**HeLa**" cell line – an "*immortal*" cell line used extensively in cancer and vaccine research. Henrietta Lacks was a young black woman from Baltimore who died from a highly malignant cervical cancer in 1951. Small pieces of her tumour were donated to a laboratory specialising in tissue cell culture. In those days most attempts to grow human cells outside the body failed. But for some unknown reason Henrietta's cancer cells grew vigorously and became known as the first successful human tissue cell line in history – the HeLa cell line commemorating the legendary **HEnrietta LACKS.**

Henrietta's cells were kept alive by feeding them a witches' brew of beef embryo extract (*the ground-up remains of a three-week-old, unborn cattle embryo*); fresh chicken plasma obtained from the blood of a live chicken heart; and blood from human placentas (*the placenta is the sac that nurtures the developing foetus and contains powerful hormones*).

It is now suspected that a sexually transmitted **Papilloma Virus** is the cause of cervical cancer. And it is anybody's guess how many other chicken, cattle, and human viruses are incorporated into the HeLa cell line, **but none of this possible viral contamination seems to bother scientists who have extensively used the cells in cancer research.** What laboratory scientists did eventually discover was that HeLa cells proved so hardy that **they frequently contaminated other tissue cell lines used in cancer and cancer virus research.**

In the late 1960s when widespread HeLa cell contamination problems were uncovered, scientists were shocked and embarrassed to learn that millions of dollars worth of published cancer experiments were ruined... " *Liver cells*" and "*monkey cells*" that were used in cancer experiments turned out to be Henrietta's cancer cells in disguise. ***Benign cells that supposedly "spontaneously transformed" into malignant cells were found to be cells contaminated with cancerous HeLa cells.***
