

### Color Test

These are the things we're supposed to do to remove the cholesterol around our brain and try to slow up Alzheimer's disease. It took me 2 times before I could finally tell this brain of mine to concentrate. A great test, do it until you get 100%!

Bet you can't get 100% on the first try! But I'm rootin' for ya...

This is pretty neat! See how you do with the colors! Have fun!

It takes an average of **5 tries** to get to 100%. Follow the directions!

It's harder than it seems, as it should be!

A brain waker-upper for today!
