

COVID-19 – Communications from Europe

From a person of unusual insight.

The German material derives from the video record of the 30th investigative hearing held by four German lawyers: Dr. Rainer Fuellmich, Viviane Fischer, Antonia Fischer and Justus Hoffmann. The relevant hearing took place on Friday, 5 December 2020. It proceeded for 4-hours – very detailed. These hearings are held in German. The video records lack English subtitles, unfortunately.

Not COVID-19 is the objective, but Operation Warp Speed. People talking about coronaviruses don't get the quintessence of what is happening at the moment. It is a farce. COVID-19 is an imaginary illness, used as a tool to manipulate the global population by fear [Biderman coercion – see S B Baldwin *et al.*, Psychological Coercion in Human Trafficking: An Application of Biderman's Framework, *Qual Health Res*, 4 November 2014: <https://escholarship.org/content/qt8nr8t1mt/qt8nr8t1mt.pdf>]. Coronaviruses (there are many of them) are not lethal for humans. So what is really going on ...

Here is a statement by Dr. Christiane Northrup, who explains the plan and its risks in a few words, but very clear: <https://www.bitchute.com/video/ilcgPD5TmWpy/>.

Further information you will find in the following links:

Our problem is, to separate the major objective from the background noise (COVID-19) which just follows the Biderman coercion method. This method was developed in 1956 but remains valid, as you can see. At the other hand, knowing what happened in 2002 (911), makes you recognize that the continuity of the plan proceeds with „warp speed“.

The lethargy in the population is extremely dangerous.

A Horrifying Future, *Global Research*, 11/25 November 2020: <https://www.globalresearch.ca/world-economic-forum-step-two-resetting-future-work-agenda-after-great-reset/5729175>

In Germany, Prof. Stefan Hockertz [recently referred](#) to the publication: A Iwasaki and Y Yan, The potential danger of suboptimal antibody responses in COVID-19, *Nat Rev Immunol*, Jun 2020; 20(6):339-341: <https://www.nature.com/articles/s41577-020-0321-6>. Iwasaki and Yan distinguish between neutralizing and binding antibodies. Specifically in relation to coronaviruses, the Japanese researchers warn that binding antibodies can promote pathology, resulting in a phenomenon known as antibody-dependent enhancement. In other words, there exists an urgent risk that the mRNA "vaccines" promoted by BioNTech/Pfizer, AstraZeneca and Moderna could in fact enhance the pathogenic potential of coronaviruses including SARS-CoV-2, and also could induce autoimmune diseases. Dr. Wolfgang Wodarg, a politically engaged German medical practitioner and public health official, points out that multiple national health authorities have purported to authorize Phase 3 clinical testing of these "vaccines" in the absence of the legislatively required preclinical testing. In particular, no toxicological investigations have been carried out. In these circumstances, Dr. Rainer Fuellmich and other German lawyers have resolved to lay criminal informations against Christian Drosten and others, alleging criminal intent to kill or to cause grievous bodily harm.

The entire alleged COVID-19 “pandemic” depends on Drosten’s deliberately meaningless PCR-test. Many German lawyers have ceased referring to Drosten as “Dr.” or “Prof.” since it emerged that his alleged PhD thesis was/is not properly deposited at the Goethe University Frankfurt.
