

## **Ed Jewitt: Transcription of Scamdemic**

13 July 2020

<https://phibetaiota.net/2020/07/ed-jewitt-transcription-of-scamdemic-video-at-end/>

“What we are actually seeing is the systematic implementation of the fall of the Republic and the rise of the Corporation of the United States. Every major event is a step on the ladder to achieve that end; COVID is just another rung on the ladder, which is why there is a deliberate mixing of all the word play.

We should stop calling it quarantine; that’s the term designed for people who are verified sick; this is house arrest, mandated by the state. We should stop call it “social distancing”; there is nothing social about forced isolation.

We should stop saying “safer at home” when millions of Americans don’t have basic necessities adequate to meet their needs; it assumes that everyone’s home is as equally as safe as the people making the statements.

We should stop saying “this is for the greater good”. When you close the economy, killing millions of businesses that families have worked generations to establish, that’s anything but good.

We should stop saying this is the “new normal”. That’s just blatant mind control dribble. There is nothing normal about forced isolation, treating your neighbor like they have the plague, breathing your own bodily waste, living in fear of constant contamination. That’s normal?

If the virus is so deadly, why hasn’t it wiped out the homeless who don’t social distance, wash themselves regularly, let alone have access to a sterile environment?

Last year, 1.5 million people died of tuberculosis. Why didn’t you wear a mask during the tuberculosis pandemic? You were endangering public health and safety along with millions of people around the globe. So why didn’t you wear a mask? I’ll tell you why. Because the main stream media didn’t tell you to wear a mask. Because though 1.5 million people died, there was no tuberculosis pandemic, any more than there is a coronavirus pandemic.

What you are really participating in is a beta test for AI systems and facial recognition. The cameras work best when you are a distance apart. Now they are actually testing, through machine learning, how to recognize a face that’s partially covered. It’s also a way to determine who is compliant and who’s not. Who does the propaganda work on, and who doesn’t it work on?

There are some ironies here. A society that kills millions of babies year for convenience has shut itself down to prevent adults from dying. People on one hand who slaughter babies in the womb by the millions are now preaching to the masses about the sanctity of human life. It’s “double-speak”, “double talk.”

It’s the “two doctrine” policy: One for the initiated, and one for the un-initiated; one for the inner circle, another for the masses.

If I violate the stay-at-home order, I could be arrested, but they’re letting criminals out of prison so they don’t get coronavirus.

Thesis. Antithesis. Synthesis.

If there is a real pandemic, does it require faulty virus models, rigged test results, 81% false positives, inaccurate news reporting, staged hospital overruns, manipulated death certificates? Nope.

When the government shuts down millions of small businesses but doesn’t lay off any government employees, it’s not about health.

When the state bans dentists from practicing, but deems it necessary for abortion clinics to stay open, it's not about your health.

When the state prevents you from buying seeds for your garden but allows you to purchase lottery tickets, it's not about your health.

An institution that has the ability to destroy all of Earth through alleged nuclear warfare, should not regulate personal self-defense.

An institution that's caught trafficking drugs should not be able to regulate plants.

[An institution that's caught trafficking children for sex, and protecting those who do, should not be allowed to govern.]

An institution that's wracked up \$23 trillion in debt prior to coronavirus shouldn't be allowed to manage the retirement fund.

An institution that was caught spreading STD's should not be allowed to run health care.

When people are really concerned about public health and safety in general but they don't care when people eat garbage, drink poison, smoke cancer, abuse prescription drugs but think that toilet paper, hand sanitizer, and masks are going to protect them from the bogeyman coronavirus, this is a special kind of stupid that I can't address here.

You should ask yourself a couple of basic questions: when did you consent from "you created the government to serve you to you serving the government ruling over you?"

If you want to know who's in charge, just think about who you can and can't criticize."
