

European Parliament issues warnings on HAARP - Weapon of Mass Destruction.

March 22, 2011

"HAARP is a project of which the public is almost completely unaware, and this needs to be remedied." Toronto, Canada - [ZNN] The daily lives of people seem blissfully unaffected by events about which they know little or nothing. Daily news reports unfold with no mention as to why and how the powerful operate behind the scenes. We pay our mortgages, book our vacations and school our children, as a corporate and government elite engage in projects beyond our wildest imaginations.

Conditioned to accept that 'all is well' or, that we are powerless to affect change in a world disintegrating before our eyes - we conduct our lives until one day it affects us directly - unfortunately by then it's far too late.

Ask the people of northern Japan how they feel about the last three sentences and the answers they now seek in the aftermath of unimaginable loss and yet another future generation desecrated and ravaged by nuclear radiation.

A European Parliament document may provide a few answers for the inquiring mind. This parliamentary document is not some conspiratorial rant but an official governmental perspective describing authentic concern that a terribly grave technology, which the document calls a weapon, has been unleashed over many years without any public knowledge.

The technology is called HAARP and the European Parliament has put NATO, the US Air Force and Navy on notice, demanding an explanation about their involvement.

One of the most damning statements in the document reveals an American refusal to account for itself regarding HAARP research:

"[The European Parliament]. regrets the repeated refusal of the United States Administration to send anyone in person to give evidence to the public hearing or any subsequent meeting held by its competent committee into the environmental and public risks connected with the high Frequency Active Auroral Research Project (HAARP) programme currently being funded in Alaska."

Caveat - For those among you who feel all is 'right and true' with the world and everything you need to know about is in newspapers, or, that those in power have our best interests at heart - you've probably read enough by now. There is almost certainly a soap opera or celebrity awards program on TV that you are missing. Or, perhaps you simply do not want to be confused by the facts. You are excused.

However, for those among you who have an inquiring mind or the patience and concern to read about such furtive things as the demise of civilization and geo-political ethics, the document below is very instructive if not despotically frightening.

The document outlines why the strange frequency of bizarre global weather and geo-tectonic disasters appear to be on the rise and why NATO, the US Air Force and US Navy have been held accountable for their knowledge and shrouded use of HAARP technology.

High Frequency Active Auroral Research (HAARP) has been deliberated upon by world governments - but none of them - including the Canadian government have commented on what it is, what it does or how it affects life on the planet.

HAARP may well be the most silent and deadly weapon of all time - primarily because it is invisible to the naked eye and thus, its existence can be denied by government and readily dismissed by media. Those in the forefront of probing and exposing this kind of government behaviour have issued warnings about HAARP for many years. Few pay any heed. The question remains - will anyone listen now?

The European Parliament document

"The European Parliament:

- having regard to the hearing on HAARP and Non-lethal Weapons held by the Foreign Affairs Subcommittee on Security and Disarmament in Brussels on 5 February 1998,"

and

"T. whereas, despite the existing conventions, military research is ongoing on environmental manipulation as a weapon, as demonstrated for example by the Alaska-based HAARP system,"

and

"Legal aspects of military activities -

26. Calls on the European Union to seek to have the new 'non-lethal' weapons technology and the development of new arms strategies also covered and regulated by international conventions;

27. Considers HAARP (High Frequency Active Auroral Research Project) by virtue of its far-reaching impact on the environment to be a global concern and calls for its legal, ecological and ethical implications to be examined by an international independent body before any further research and testing; regrets the repeated refusal of the United States Administration to send anyone in person to give evidence to the public hearing or any subsequent meeting held by its competent committee into the environmental and public risks connected with the high Frequency Active Auroral Research Project (HAARP) programme currently being funded in Alaska;

28. Requests the Scientific and Technological Options Assessment (STOA) Panel to agree to examine the scientific and technical evidence provided in all existing research findings on HAARP to assess the exact nature and degree of risk that HAARP poses both to the local and global environment and to public health generally;

29. Calls on the Commission, in collaboration with the governments of Sweden, Finland, Norway and the Russian Federation, to examine the environmental and public health implications of the HAARP programme for Arctic Europe and to report back to Parliament with its findings;"

and

"HAARP - a weapons system which disrupts the climate

On 5 February 1998 Parliament's Subcommittee on Security and Disarmament held a hearing the subject of which included HAARP. NATO and the US had been invited to send representatives, but chose not to do so. The Committee regrets the failure of the USA to send a representative to answer questions, or to use the opportunity to comment on the material submitted.(21)

HAARP (High Frequency Active Auroral Research Project) is run jointly by the US Air Force and Navy, in conjunction with the Geophysical Institute of the University of Alaska, Fairbanks. Similar experiments are also being conducted in Norway, probably in the Antarctic, as well as in the former Soviet Union.(22) HAARP is a research project using a ground based apparatus, an array of antennae each powered by its own transmitter, to heat up portions of ionosphere with powerful radio beams.(23) The energy generated heats up parts of the ionosphere; this results in holes in the ionosphere and produces artificial 'lenses'.

HAARP can be used for many purposes. Enormous quantities of energy can be controlled by manipulating the electrical characteristics of the atmosphere. If used as a military weapon this can have a devastating impact on an enemy. HAARP can deliver millions of times more energy to a given area than any other conventional transmitter. The energy can also be aimed at a moving target which should constitute a potential anti-missile system.

The project would also allow better communications with submarines and manipulation of global weather patterns, but it is also possible to do the reverse, to disrupt communications. By manipulating the ionosphere one could block global communications while transmitting one's own. Another application is earth-penetrating, tomography, x-raying the earth several kilometres deep, to detect oil and gas fields, or underground military facilities. Over-the-horizon radar is another application, looking round the curvature of the earth for in-coming objects.

From the 1950s the USA conducted explosions of nuclear material in the Van Allen Belts(24) to investigate the effect of the electro-magnetic pulse generated by nuclear weapon explosions at these heights on radio communications and the operation of radar. This created new magnetic radiation belts which covered nearly the whole earth. The electrons travelled along magnetic lines of force and created an artificial Aurora Borealis above the North Pole. These military tests are liable to disrupt the Van Allen belt for a long period. The earth's magnetic field could be disrupted over large areas, which would obstruct radio communications. According to US scientists it could take hundreds of years for the Van Allen belt to return to normal. HAARP could result in changes in weather patterns. It could also influence whole ecosystems, especially in the sensitive Antarctic regions.

Another damaging consequence of HAARP is the occurrence of holes in the ionosphere caused by the powerful radio beams. The ionosphere protects us from incoming cosmic radiation. The hope is that the holes will fill again, but our experience of change in the ozone layer points in the other direction. This means substantial holes in the ionosphere that protects us.

With its far-reaching impact on the environment HAARP is a matter of global concern and we have to ask whether its advantages really outweigh the risks. The environmental impact and the ethical aspect must be closely examined before any further research and testing takes place. HAARP is a project of which the public is almost completely unaware, and this needs to be remedied.

HAARP has links with 50 years of intensive space research for military purposes, including the Star Wars project, to control the upper atmosphere and communications. This kind of research has to be regarded as a serious threat to the environment, with an incalculable impact on human life. Even now nobody knows what impact HAARP may have. We have to beat down the wall of secrecy around military research, and set up the right to openness and democratic scrutiny of military research projects, and parliamentary control.

A series of international treaties and conventions (the Convention on the prohibition of military or any other hostile use of environmental modification techniques, the Antarctic Treaty, the Treaty on principles governing the activities of states in the exploration and use of outer space including the moon and other celestial bodies, and the UN Convention on the Law of the Sea) casts considerable doubt on HAARP on legal as well as humanitarian and political grounds. The Antarctic Treaty lays down that the Antarctic may be used exclusively for peaceful purposes.(25) This would mean that HAARP is a breach of international law. All the implications of the new weapons systems should be examined by independent international bodies. Further international agreements should be sought to protect the environment from unnecessary destruction in war."

[This document was written 13 years ago.]

Although there seems to be no official or current governmental and scientific confirmation of the effects of HAARP technologies in your local newspaper or on the 11:00 o'clock news - the people of Japan might want an update.

A news service that takes you to the edge. and beyond.

HAARP was developed by Raytheon, a defense contractor; and then it was HANDED BACK to the USGovt under the table. I don't know if anyone knows WHOSE running and controlling it now. Brown Shirts!

2..

lou on March 23, 2011 at 5:55 pm

Far from being a "research" project HAARP is actively disrupting this earth. HAARP was upgraded in the last few years and IMO must be considered at war with mankind.

If you check the power out put of the HAARP you will find it has been active during ALL of the last four major earthquakes. Starting with the Japanese 9.0 of march 11

<http://137.229.36.30/cgi-bin/magnetometer/gak-mag.cgi>

Now folks what are the odds that this is "co-incidence"?
Among other things HAARP is an earthquake machine
