IMVA Emergency Alert

Yulia Tymoshenko, prime minister of Ukraine and a candidate in upcoming national elections, visits a children's hospital in western Ukraine.

Prime Minister Tymoshenko stated, “We cannot relax even for a moment because the World Health Organization (WHO) predicts two more waves of flu, including the bird flu, are expected in Ukraine. There is no alternative to vaccination. The entire world is going this way...” A day earlier she admitted she was not vaccinated and that she prefers “like all other people” plans to rely on garlic, onion and lemon as a way of preventing the flu. Commenting on what’s going on in Eastern Europe [F. William Engdahl](#) says, “The degree of fraud, deceit, official cover-up and outright criminal endangerment of the broad population by the current Swine Flu hysteria is seemingly without precedent.”

What I said a few weeks ago about the economy I repeat again in terms of what is [happening](#) in the [Ukraine](#) with the [swine flu](#), a new genetic strain of it or something entirely new. President Yushchenko said: “People are dying. The epidemic is killing doctors.” Doctors in Ukraine's western Chernovetsky region, near the centre of the flu outbreak, said lab tests showed at least some of the fatalities appeared to be caused by something dissimilar to both common flu and swine flu.

OFFICIAL NUMBERS of Sick Released 12th of November
1,253,558 SICK
65,615 HOSPITALIZED
239 DEAD

Reports of aerial spraying right before the plague hit will probably never see the light of day but if a person does not believe that there are people who would do such a thing they really are

not familiar with the dark side of humanity. Dr. Gregory J. Moran, an associate professor in the department of emergency medicine in Los Angeles says, “Plague may be rare today in the United States, but health care professionals should be aware of its **potential as a weapon, because its pathogens are easily aerosolized** and the symptoms are not likely to arouse suspicion until an epidemic is evident. If plague were to be used as a biological weapon, the pathogens would likely be spread via aerosol and inhaled, leading to the pneumonic form.” [1]

After weeks of silence in the western press the [New York Times](#) finally reported on 13th of November, “When patients began arriving in Dr. Vyacheslav Bonder’s intensive care unit two weeks ago, their lungs so saturated with blood that they could barely gasp, the only thing he could compare it to was a field hospital in wartime. As soon as he hooked one patient up to a ventilator, a second and third would appear in the doorway.”[2]

The virus causing the deaths is extremely aggressive, it doesn't first infect the throat (as is common in flu), but strikes the lungs directly.
Dr. Viktor Bachinsky

The entire nation of Ukraine is in an absolute state of panic as a mystery illness rips through their country. The pandemic in the [Ukraine is threatening](#) the lungs of flu victims with [hemorrhage](#) The first alarm came in August when a microbiologist calls into a radio show[3] run by a doctor with dire warnings about what was about to be deliberately released in the Ukraine and then is hunted down in L.A. by a SWAT squad and its all displayed on this [bizarre video](#). Now just two months later the Sunday Express is reporting, “A doctor in Western Ukraine who did not want to be named, said:” **We have carried out post mortems on two victims and found their lungs are as black as charcoal. They look like they have been burned.** It’s terrifying.”[4]

Please note that this is the first IMVA Emergency Alert and see associated essay and our Natural Emergency Medicine protocol for suggested best medical responses. My advice to my beloved readers and to the world at large is to prepare for the worst, accept and use worst case scenario planning and take what is happening to heart with a fierce determination to protect ones family from what seems likely to come. And this means eating more than garlic, onion and lemon though this is a good medicinal combination to start with.

Special Note: The Ukraine and the rest of Eastern Europe are currently the weakest pegs in the world financial system, besides California and a host of other states. While they are celebrating on Wall Street certain areas of the world are facing collapse. [Crisis spreads to Eastern Europe as Ukraine](#), Hungary and Serbia call IMF Ukraine, Hungary, and Serbia are all in emergency talks with the International Monetary Fund, raising fears that an exodus of foreign investors will set off a systemic crisis across Eastern Europe. A team of IMF trouble-shooters rushed to Kiev on Wednesday to draw up a possible standby loan to **help Ukraine stabilize its bank after a panic run on deposits this month**. Meanwhile banks in Sweden and The Baltic states are in the eye of the storm after leaked reports that Sweden is bracing for a [full-blown](#)

[economic and political "breakdown" in Latvia](#). The Svenska Dagbladet newspaper said Sweden's finance minister Anders Borg had told banks secretly that **Latvia's political order was unraveling**, advising them to prepare for the collapse of Latvia's rescue talks.

Eastern Europe offers us a looking glass into the future that is happening in certain places today. Consider that accurate news is a precious commodity rarer than exceptional stones. We hardly hear in the mainstream about the crisis facing many States in America, how much less about Eastern Europe. The model presented by many thinkers is one where we see the Internationalist One World Government super elite taking advantage of and instigating crisis in both economic and health areas simultaneously. Kind of like doing a cannon ball on top of a man coming up for air; what we are seeing today in the Ukraine and the rest of Eastern Europe might be a harbinger of what is planned for the rest of us.

[3] On August 12 Israeli bioscientist and MOSSAD agent Joseph Moshe called the studio of Dr. A. True Ott after a radio talk program. He claimed that tainted H1N1 Swine flu vaccines were being produced by Baxter BioPharma Solutions and said that Baxter's Ukrainian lab was in fact producing a bioweapon disguised as a vaccine. He claimed that the vaccine contained an adjuvant (additive) designed to weaken the immune system, and replicated RNA from the virus responsible for the 1918 pandemic Spanish flu, causing global sickness and mass death. The next day his standoff with Los Angeles police was televised live.
