Jane Burgermeister

This site is the official site of Jane Burgermeister and her investigation regarding the flu vaccines, WHO and the criminal conduct of several companies and organisations. Here evidence is collected and presented which, according to Jane Burgermeister, reveals that there is a plan in action to reduce the world population by using contaminated vaccines. Jane Burgermeister shows that several international organisations are involved with this plan as are several international companies. Together these form a criminal syndicate which in secret intend to "save the planet" from what is considered harmful overpopulation.
