Pain Management with No Drugs or Chemicals

3 November 2017

Chronic pain, alone, affects 1.5 billion people around the world, leading to billions of dollars in health care costs and lost work productivity each year [1]. When used as part of a healthy lifestyle, IceWave is a safe, powerful and affordable solution with no drugs, chemicals or stimulants.

IceWave is specifically designed to provide relief at the source of discomfort. If you have knee pain, for instance, you can place the patches around that area for quick relief. If you have pain throughout your body, there are different placement options that produce equally effective results. Visit the LifeWave YouTube page <https://www.youtube.com/user/LifeWaveVideos/videos> for more IceWave Patch Placement Instructions. With its non-drug, non-addictive approach, IceWave truly stands apart from other pain management products on the market today.
