

GERMANS & RUSSIANS USED FLUORIDE TO MAKE PRISONERS STUPID & DOCILE

By: Devvy .. May 14, 2005

"To whom it may concern: I, Oliver Kenneth Goff, was a member of the Communist Party and the Young Communist League from May 2, 1936 to October 9, 1939. During this period of time, I operated under the alias of John Keats and the number 18-B-2. My testimony before the Government is incorporated in Volume 9 of the Un-American Activities Report for the year 1939.

"While a member of the Communist Party, I attended Communist underground training schools outside the City of New York in the Bues Hall and 113 East Wells Street, Milwaukee, Wisconsin. The East Wells Street School operated under the name of the Eugene Debs School. Here, under the tutoring of Eugene Dennis, M. Sparks, Morris Chyilds, Jack Kling and others, we were schooled in the art of revolutionary overthrow of the established Government.

"We discussed quite thoroughly the fluoridation of water supplies and how we were using it in Russia as a tranquillizer in the prison camps. The leaders of our school felt that if it could be introduced into the American water supply, it would bring about a spirit of lethargy in the nation; where it would keep the general public docile during a steady encroachment of Communism.

We also discussed the fact that keeping a store of deadly fluoride near the water reservoir would be advantageous during the time of the revolution, as it would give us opportunity to dump this poison into the water supply and either kill off the populace or threaten them with liquidation, so that they would surrender to obtain fresh water.

"We discussed in these schools, the complete art of revolution: the seizure of the main utilities, such as light, power, gas and water, but it was felt by the leadership that if a program of fluoridating the water could be carried out in the nation, it would go a long way toward the advancement of the revolution." Oliver Kenneth Goff, 1
