

Benefits of Fulvates: Organic Fulvic Acid

12 February 2012, Dani Walker

Fulvates are commonly referred to as fulvic acid. There are numerous benefits of fulvic acid but we must first understand its importance: For minerals to be effectively utilized by living organisms, they must first be converted from their colloidal or metallic state to a microscopic sub colloidal or ionized state. Before this process colloidal minerals & nutrients are too large for the body to easily absorb & can be released as waste instead of absorbed & utilized by the body.

This is why it is extremely important to have an organic (plant based) fulvic acid with all vitamin and mineral supplements.

Fulvates Deliver Vital Nutrients to the Gastrointestinal System, Bloodstream and Cells.

Fulvates Eliminate Toxins from Body – and serve a dual role within the human body.

As a donor, fulvates deliver life force energy: substantial electrical energy, minerals and other nutrients to the body.

As an acceptor, fulvates clear out toxins, energy depleted nutrients, and exhausted minerals from the cell.

Fulvates Build Healthy and Strong Bone – Enhances intestinal permeability to the minerals calcium, magnesium, iron, manganese, zinc and sulfate. Enhance skeletal health by supporting the natural body processes that utilize calcium and all minerals for strong bones.

Fulvates promote smooth supple skin – Promote healthy, supple skin when applied topically. (People spend thousands of dollars to go to the Dead Sea for mineral-rich mud treatments-receive the same nutrition with SpectraMAXX™)

Multiple Benefits of Organic Fulvic Acid:

- Fulvic Acid will alkaline the blood faster than any other natural health product on earth.
- Fulvic Acid has over 77 Macro and Trace Minerals, naturally occurring in their ionic (nano) form for ultimate absorption.
- Humic Acid and Fulvic Acid work together to remove unwanted salt acids that surround and harden cell walls, creating cell permeability.
- Fulvic Acid is the electrolyte that enables our cells to absorb nutrients and is a multi-directional antioxidant.
- Fulvic and Humic Acid, Trace Minerals and Essential Amino Acids are required for a myriad of metabolic functions, yet cannot be produced by the body.
- Fulvic Acid detoxifies the body by eliminating heavy metals and toxins (including radiation) and is considered the most powerful form of Oral Chelation.
- Fulvic Acid allows other Super-Foods, Vitamins, and Herbs to be absorbed and effectively utilized by the body.
- Fulvic Acid provides increased energy, mental clarity, and sense of well being by feeding and nourishing every cell in the body.

Organic Trace Minerals are the "gift of life" and cellular function becomes impossible without them!

"Laboratory tests prove that the fruits, the vegetables, the grains, the eggs, and even the milk and meats of today are not what they were just a few generations ago. No man of today can eat enough fruits and vegetables to supply his system with the minerals he requires for perfect health." (Quote from the United States Senate Document 264 printed in 1936).
