

Swine/avian flu, the story so far.

MONDAY, 17 AUGUST 2009

[Swine flu, the true story.](#)

The information on this blog is not about Tamiflu, which by the way has been proven is no antidote for H5N1 [swine flu] and, its side effects are sometimes very severe, see 'Tamiflu turned my children into hallucinating, sobbing wrecks'

Aug 13 2009

<http://www.dailymail.co.uk/health/article-1206215/Tamiflu-turned-children-hallucinating-sobbing-wrecks.html>

The information on this blog is in regard to the swine flu pandemic and the **mandatory** swine flu vaccine that the Government and the World Health Organisation will **force** upon us.

The information is laid out in date order and is a series of internet links to news stories that totally discredit all the misinformation, lies and deceit that the main stream media have been putting out.

Even if you personally do not think there is any substance to the information, I would still think it's only fair that you pass this information on to everyone you know, and let them draw their own conclusions. Please do not assume that people are already aware of this information.

I began to research the Avian/Swine last year when my partner, an NHS employee began her intensive training for the predicted flu pandemic. Initially I was uninterested, but after hearing more I became suspicious and began researching this much more closely. They were informed of a possible pandemic in early 2009, dipping and then returning with a vengeance by the end of the year. Massive loss of life was predicted, more than the 1918 Spanish flu epidemic. The NHS would be overwhelmed. A contingency plan is in place to use refrigerated warehouses or containers to store bodies. [Google "NHS to use refrigerated storage during flu pandemic"] In 2006 it was confirmed that millions of extra body bags were ordered as a precaution. How did the NHS know they would need millions of body bags? NHS employees were told to keep quiet about this, so as to not cause panic and mayhem, (Bull- population control comes to mind). They may have to work a massive amount of overtime, will have to wear protective clothing and take precautionary measures. They are predicting a major human catastrophe with huge loss of life. Hospitals, doctors and morgues will be stretched to capacity. If you know anyone who works in the NHS do some digging, ask questions

Now senior management in the NHS, are reporting there is growing concern about mandatory vaccines for the swine flu, they are receiving a huge amount of internal e mails daily, staff are questioning the safety of the vaccines.

So please I urge you, do not dismiss this, do your own research, but the most important thing is to pass this information on to everyone, let them make up their own mind as to whether or not the swine flu vaccine will be safe. There is something massively suspect going on.

Are you aware that vaccines typically contain many of the following fillers:

- * **aluminum** hydroxide* **aluminum phosphate*** ammonium sulfate* amphotericin B
- * animal tissues: pig blood, horse blood, rabbit brain, dog kidney, monkey kidney,
- * chick embryo, chicken egg, duck egg* calf (bovine) serum* betapropiolactone
- * fetal bovine serum* **formaldehyde*** formalin* gelatin* glycerol
- * human diploid cells (originating from human aborted fetal tissue)
- * hydrolized gelatin* **mercury** thimerosal (thimerosal, Merthiolate(r))
- * monosodium glutamate (MSG)* neomycin* neomycin sulfate* phenol red indicator
- * phenoxyethanol (**antifreeze**)* potassium diphosphate* potassium monophosphate
- * polymyxin B* polysorbate 20* polysorbate 80
- * porcine (pig) pancreatic hydrolysate of casein* residual MRC5 proteins* sorbitol
- * tri(n)butylphosphate,
- * VERO cells, a continuous line of monkey kidney cells, and
- * washed sheep red blood

Nice mix don't you think.

Swine Flu, this is the true story, and it's not a fairy story with a happy ending, this is real.

Will the **swine flu vaccine** be safe, are you prepared to be a guinea pig for an **untested vaccine**, and are you prepared to take the risk, join the dots, and see the bigger picture?

Is it the vaccine that will be the problem?

Note – WHO stands for World Health Organisation.

Now, shall we see how the story unfolds, here are some rather interesting links for you to look at.

Horror Emergency Laws Set To Kill * [Must read]

[Wise Up Journal](#)

Jan 2 2009

The Health act gives the power of relocating people (persons) to government facilities/camps/accommodation: [Health Act section 40](#), “A health authority may provide accommodation for persons who are compelled to leave their homes on account of any steps taken under this Act or the regulations made thereunder for the prevention of the spread of infectious disease.” It gives the government the right to **detain people in government facilities** not just hospitals with the following line, “the order to allow for the patient’s isolation in a hospital or **other place convenient**“.

[Health Act section 32](#) A and B below deals with the entire population not just the infected and uninfected population incarcerated in hospitals and “other places”. It gives the Minister **power to order the injection of the entire population** (quote: “all adult persons” and “all children”) with a vaccine they believe might immunise against a pandemic “caused by a new influenza strain“. You are probably thinking how could they create a vaccine so fast, doesn’t it take years to prove it is safe? They are prepared to alter the entire population’s immune system and DNA with what would be officially an untested experimental vaccine, are you prepared for that? It’s the law now.
