

101 USES FOR THE YOUNG LIVING® THIEVES® PRODUCTS

Welcome to the Wonderful World of Thieves®

Thieves® Oil Blend is formulated with highly antiviral, antiseptic, antibacterial and anti-infectious essential oils. Thieves® Oil Blend was created based on research of a group of 15th century thieves in France who protected themselves by rubbing themselves with cloves, rosemary, and other aromatics while robbing plague victims. This Young Living proprietary blend was university tested and found to be highly effective in supporting the immune system and good health. This proprietary blend has also been documented to kill over 99.96% of bacteria it comes into contact with.

Thieves® Oil Blend – use directly from bottle, diffuse, or dilute with purified water to spritz

Ingredients:

Clove (*Syzygium aromaticum*) has a sweet, spicy fragrance that is stimulating and revitalizing. An important ingredient in Thieves® Blend due to its wonderful immune-enhancing features, its principal constituent is eugenol, an element that is used in the dental industry to numb gums. Clove is the highest-scoring single ingredient ever tested for its antioxidant capacity on the ORAC scale.

Lemon (*Citrus limon*) has antiseptic-like properties and contains compounds that amplify immunity. It promotes circulation, leukocyte formation and lymphatic function.

Cinnamon Bark (*Cinnamomum verum*) has the wonderful cinnamon scent loved around the world. Warming and stimulating, it is comforting during the cold season. Many people find it highly romantic. Historically, cinnamon was so popular it was the main reason behind the occupation of Ceylon by first the Portuguese, then the Dutch and then the British.

Eucalyptus (*Eucalyptus radiata*) is cooling, refreshing and energizing. Lighter in smell than *Eucalyptus globulus*, it nevertheless has many of the same health-supporting properties. Because it is relatively gentle and non-irritating, it is the preferred choice for children. This variety is one of the most versatile of the eucalyptus oils and is suitable for topical use, diffusing, and even direct inhalation. It has long been an ingredient in some of our most popular blends.

Rosemary* (*Rosmarinus officinalis CT cineol*) has a fresh, herbaceous, sweet, slightly medicinal aroma. An energizing oil, it may be beneficial for helping to restore mental alertness when experiencing fatigue.

* Caution: Do not use on children under 4 years of age.) It is also a popular ingredient in skin and hair care products.

What is Anti? “Against”

What is Microbial? “A minute living organism, minute forms of life, which are capable of causing disease including bacteria and fungi.”

Essential Oils create an unfriendly environment which becomes deadly to disease causing bacteria, viruses and other pathogens.

Diffuser

DIFFUSING

Thieves® essential oil blend with the Young Living® patented diffusing system creates a safe and simple means of filling your home with therapeutic benefits. Many forms of bacteria and mold spores linked to many common ailments can travel through the air. Diffusing Thieves adds an extra layer of protection by purifying the air while adding an uplifting scent to your home.
