## **Obama's H1N1 Swine Flu National Emergency Evidences Vaccine "Market-Building" for Mass Murder**

by **Leonard Horowitz and Sherri Kane**

Los Angeles--President Obama's declared H1N1 emergency cannot be reconciled by either vaccine shortages or flu cases; only by medical "market-building," vaccination intoxications, and mass murder for population reduction says common sense and mounting evidence.

Over the weekend, initial reports from Reuters News Service and Fox News stated that the President's declaration was intended to prepare the country in case of "a rapid increase in illness that may overburden health care resources." The media quoted an unidentified administration official saying, "It's important to note that this is a proactive measure -- not a response to a new development." This action was "similar to disaster declarations issued before hurricanes hit coastal areas," Reuters reported.

Why would the Obama administration anticipate an H1N1 "hurricane" to hit when Purdue researchers concluded last week the epidemic was expected to peak this week? In fact, too soon for vaccines to be helpful.

Thus, most people getting vaccinated now risk side effects for NOTHING--no benefit what-so-ever!

Furthermore, CBS News determined last week the CDC's reported H1N1 cases had been overblown up to 97 percent. Only about 1,000 people have died of H1N1 since April's Mexican outbreak. That is merely 1/18th, or less than 6%, of expected deaths from a normal seasonal flu during the same time period.

It is highly suspicious that David A. Paterson, New York State's Governor, suddenly suspended "mandatory" H1N1 shots for health professionals citing vaccine shortages, not litigation exposures, as cause for the policy change.

Neglecting notice that more than 60 percent of nurses in New York State refused to take the H1N1 vaccines according to polls, and unions had filed lawsuits against New York and Washington State to gain injunctions against mandated injections, Paterson's yellow press blamed "limited vaccine supplies" as reason to inject pregnant women and children exclusively. Only two weeks earlier, New York State officials posted their first priority, "as established by the CDC," to vaccinate health care workers and emergency medical services personnel.

Oddly, all this talk about sudden vaccine shortages being the cause of a federal emergency grossly contradicts what many health officials were saying merely three weeks ago. United Press International (UPI) reported, for instance, Dr. Judy Monroe, Indiana's state health commissioner, said that an ample supply of the vaccine would be available for everyone by mid-October. Now, suddenly, there is an alleged shortage that compels mixed messages and general confusion.

### **"Shortage Marketing" Disease and Death**

"This is called "shortage marketing," Dr. Leonard Horowitz explains. "It is an increasing trend in the industrial world to get consumers to purchase products that are unappealing, over-inventoried, or scarce."

For weeks preceding Obama's declaration of national emergency polls showed the vast majority of Americans, including health care workers, rejecting the seasonal and H1N1 flu vaccines. So with stockpiles high, despite allegations of manufacturing delays, the government's promotions and policy changes simply reflect "shortage marketing."

But this is a "superficial concern" according to Dr. Horowitz, who references neurobehavioral and neurocognitive disorders demonstrated in vaccine recipients who were normal before getting vaccinated. He credits the brilliant work of Andrew Moulden, MD, PhD, photographically detailing tremendous physical damage occurring following vaccinations. These previously unknown and unseen subtle changes in nerve function and

physical appearance is now demonstrated in pictures by Dr. Moulden that are irrefutable in courts and the scientific world.

Dr. Horowitz, a Harvard-trained expert in behavioral science, media persuasion and public health education, has spent 20 years documenting drug industrialists' and health officials' criminal actions.

"The only way to reconcile President Obama's declaration of emergency, given the increasing risks of vaccine injuries, post-peak diminishing risks of H1N1, and the anticipated public health nightmare caused by live viruses "shedding" from those vaccinated to unvaccinated persons, is to follow the flow of money," Dr. Horowitz says. "In the process of shedding vaccination H1N1, the highly unstable shed virus is expected to pick up more lethal genes from other circulating viruses, including possibly H5N1 that kills nearly 60 percent of those infected."

Dr. Horowitz notes that authorities have been mum on the triple recombinant H1N1 produced in labs for use in the "active" vaccine. Experts know this is highly unstable, because it is a man-made laboratory creation that did not evolve naturally over the millennia. This unstable mutant more readily recombines with other circulating viruses when it is shed for up to 3 weeks, thus exposing non-vaccinated people who are infected with other viruses.

This is the best explanation for Obama's anticipated "hurricane," explains Dr. Horowitz, who criticizes the mainstream media for completely neglecting this greatest risk while falsely reporting vaccine "shortages." Something else is obviously happening behind the scenes that only seasoned investigators can discern, he says.

He diagnoses the alleged vaccine shortage as a profitable ploy used by those "who have outrageously obvious connections to the Population Council, the preeminent organization directing global depopulation, as encouraged by Obama's science czar, John Holdren.

Dr. Holdren is the co-author of the 1977 book, *Ecoscience*, which calls for massive global depopulation using sterilizing vaccinations.

Dr. Horowitz points to the fact that Nonoxynol-9, a spermicidal drug causing spontaneous abortions in pregnant women, and birth defects in infants, is one of the many new "adjuvants" banned in the United States, but used by the American-based Baxter Company in their H1N1 flu vaccines stockpiled by European nations.

### **Outrageous Conflicting Interests**

Dr. Horowitz also suggests discerning conflicting interests between vaccine makers and the news sources that break the federal government's announcements, in this case Reuters and FOX news.

Reuters is directed by Thomas H. Glocer, a Merck & Co. director making money from H1N1 vaccine sales through Merck's subsidiary, CSL, Inc. Merck also sells Pneumovax, a vaccine suggested for use at the time influenza vaccines are given, yet contraindicated in people with active influenza infections.\*

A "live" H1N1 vaccine infects those vaccinated with "active" viruses. Thus, Merck's suggested Pneumovax usage is contraindicated according to their own package insert!

If that's not bad enough, CSL, Inc. did its H1N1 vaccine safety testing on pregnant women, infants, and children at facilities financed by Rupert Murdoch and his family--the Royal Victoria Women's Hospital directed by Elisabeth Murdoch, and the Murdoch Children's Research Institute overseen by Rupert's daughter-in-law Susan Murdoch. So much for FOX News's impartiality.

The *Wall Street Journal* that announced "New York Ends Flu Shot Mandate for Health Care Workers" on October 23rd, is disqualified by way of its links to Merck also. . . . *WSJ* CEO Councilman, David Brennan, directs the AstraZeneca's Flumist manufacturer, Medimmune, Inc. AstraZeneca drafted Brennan from Merck & Company, and appointed him CEO in 2006.

This pattern of gross conflicting interests, and coordinated multi-media genocidal counterintelligence, expands with reading Thomas Glocer's article wherein Reuters plugs "an experimental new drug called peramivir, made by Biocryst Pharmaceuticals Inc."\*\*

Peramivir is produced by Jon P. Stonehouse's BioCryst Pharmaceuticals, Inc. President and Chief Executive Officer, Stonehouse recently served as Senior Vice President of Corporate Development at (surprise, surprise) Merck. At Merck, Stonehouse was responsible for "leading strategic developments . . . [that] significantly changed the company," according to BioCryst's website.

### **The Partnership for New York City and Council for Depopulation**

It is obvious that our H1N1 "intelligence" is being gathered and broadcast from the highest levels of the medical-media's mafia. As previously reported in Dr. Horowitz's "AFFIDAVIT," submitted to the FBI earlier this month, and filed last week in a lawsuit against federal officials in Washington State, David Rockefeller, Rupert Murdoch, Thomas Glocer, and other media moguls are partnered in the world's most powerful drug ring and biotechnology consortium. Its members include the government of New York State as well as the US Federal Government. Proof of these facts are available for inspection online at [The Partnership for New York City \(PFNYC\)](#). The site provides its members list and related pharmaceutical industry activities.

The Founder of PFNYC, David Rockefeller, wields tremendous influence over many of the foundations and institutions that direct the US Federal Government's policies and practices. American "health care reform" is currently directed, on behalf of the Democratic party, by Sen. Jay Rockefeller.

[The Rockefeller Brothers Fund](#) granted millions of dollars to the [Population Council](#) of the City of New York during its formative years. Rockefeller family members founded this Population Council, according to [The Rockefeller Archive Center](#). The organization currently advances globally as the world's premier depopulation advocacy group. The US Federal Government and private institutions fund the Population Council at this time.

### **Summary and Conclusion**

"Biopreparedness" for the 2009 H1N1 Swine Flu is all about mind manipulation and vaccination for population reduction.

In the past week, the swine flu situation went from near ending to causing a "National Emergency." People, aware of the dangers of H1N1 vaccinations, opted out and gained precedent-setting federal court prohibitions on mandatory vaccinations. CBS declared the numbers of H1N1 cases fraudulently overstated by the CDC, and additional lawsuits were filed exposing State and Federal officials for genocidal malfeasance.

Rather than admitting disgrace, government spin doctors integrated vaccine "shortage marketing" as a

distraction for public consumption. New York State Health Commissioner, Richard F. Daines, who said only a week ago that health workers must be vaccinated for the seasonal flu and the H1N1 virus, or risk discipline, said that scarce vaccines would be given exclusively to pregnant women and children.

Ironically, US Health and Human Services Secretary, Kathleen Sebelius, pledged 10 percent of vaccines would be donated to other countries.

All of this preceded Barack Obama's declaration of "National Emergency," thus, exercising Executive power to implement The Model State Emergency Health Powers Act affecting most of the 50 States.

Obviously, none of this makes much sense unless you examine the fundamental and overriding intoxication and depopulation agendas, and what the media moguls know that few commoners learn: the H1N1 vaccines contain "live" viruses that are highly unstable. As laboratory "reverse engineered" genetically spliced germs, they are expected to recombine with more deadly viruses, possibly H5N1, by January, 2010. These new strains, circulating the globe, are projected to kill nearly 3 billion people. This Lex Lutheresque evil is obviously orchestrated by David Rockefeller's family and friends that control vaccine manufacturing, "health care reform," mass media persuasion, and global depopulation industries.

Like it or not, you are advised to prepare for the worst.

**-end -**

\*Thus, "live" H1N1 vaccinated viruses causing influenza-like symptoms in people simultaneously injected with Pneumovax is arguably medical malpractice.

\*\*This article came out the same day as the *Wall Street Journal* article, synchronous with Obama's emergency declaration, on Friday, Oct. 23rd. Then the U.S. Food and Drug Administration (FDA) issued an emergency use authorization for peramivir encouraging intravenous used in patients who cannot take pills, Tamiflu, or Relenza.

**NOTE TO JOURNALISTS:** Dr. Horowitz is asking why silver hydrosols are being completely neglected by mainstream media when these simple revolutionary mineral waters safely and effectively terminate infectious diseases caused by pathogenic viruses, bacteria, fungi, and parasites. He invites everyone to research OxySilver for its proven benefits online at [www.OxySilver.net](http://www.OxySilver.net).

Investigative journalist and co-author, Sherri Kane, is working with Dr. Horowitz to advance Healthy World Organization (HWO), a natural alternative to David Rockefeller et. al.'s, World Health Organization. Information about HWO is available at: [HealthyWorldOrganization.org](http://HealthyWorldOrganization.org).

To prepare for serious flus, see Dr. Horowitz's comprehensive website [FLUscam.com](http://FLUscam.com). Herein he endorses natural alternatives to vaccines including vitamin C and vitamin D. See his "[FLU To Dos](#)" page.

Dr. Horowitz and Ms. Kane have co-authored a terrific newsletter to wake people up about what is really happening with H1N1 2009 Swine Flu. Download that pdf file for free from [FLUscam.com](http://FLUscam.com), take it to your local printer, and distribute these newsletters throughout your community.
